

We are Proud to Announce...
Computer Forensics SERVICES

We now are able to offer computer forensic services including the recovery of deleted data from computer hard drives and external storage devices including camera and cellular phone memory cards, SIM cards, and flash drives.

Computer forensics can assist in:

- Uncovering inappropriate computer use, such as: internet surfing history, web sites visited, social networking sites, internet chats and inappropriate website activity.
- Recovery of email messages and other deleted files.
- Uncovering data theft including trade secrets, copyright infringement, customer lists, company files.
- Determining if data has been saved to unauthorized media storage USB drives.
- Creating a forensic image of the hard drive from an employee's computer to maintain a pristine record of that computer as of a certain date and time.

Please Allow us to Introduce
